| • Cybersecurity | • GitHub | • Hydra |
| • Python | • MySQL | • Linux |
| • HTML | • Operating Systems | • Metasploit |

RELATED EXPERIENCE

Software Developer

Lucid Bytes Corporation

Feb 2023 - March 2024

Thrissur, India

- Lucid Bytes Corporation is a dynamic and innovative startup specializing in providing software consultancy services to businesses of all sizes. It is a startup company from our college in association with IEDC.
- Gather and analyse user requirements and system specifications.
- Develop software components and modules according to specifications.
- Maintain and update existing software to improve performance, fix bugs, and add new features.
- Work with team members, participate in code reviews, and communicate with cross-functional teams and clients.

TryHackMe

I have successfully tackled more than 40 cybersecurity rooms on TryHackMe, honing my abilities in penetration testing, ethical hacking, and network security.

VulnHub

Practiced penetration testing techniques on over 10 VulnHub machines, honing my skills in identifying and exploiting vulnerabilities in various environments.

PROJECTS

Real time violence detection using audio and video.

Bachelor Project

- A deep learning model for violence detection in real-time using audio and video.
- Collection of data from different sources for training and testing the models.

Wholeness: A Lifestyle Maintenance App using Flutter & Firebase.

Bachelor Project

- Created an application for fitness which includes features for stress relief, medicine intake reminder, skin care plan and Calorie meter.
- Management of database for calorie calculation and other features.

CERTIFICATIONS

Certified Penetration Tester, RedTeam Hacker Academy

August 2024 - November 2024
